

FILTERING VENTILATION SAFETY CABINET

▲ AF42+ + CORG201

1 Touch screen

2 Active charcoal filter

3 Control window

4 Sampling port test of the filter saturation

5 Perforated shelves adjustable in height

6 Absorbent mat in the Containment sump

COMPLIANCE

- Adsorption capacity of active charcoal filters and filtration system tested to NF X 15-211 - May 2009.
- Standardized warning labels in accordance with ISO 3864 standard, and with European directive 92/58/EEC.
- Compliant with the public health code (articles R5132-66 and R5132-68).
- Electrical assembly complies with the requirements of the low voltage directive 2014/35/EU and EMC Directive 2014/30/EU.
- Equipment conforms to the requirements of IEC61010-1.

ADVANTAGES

- **Labopur®** technology.
- Cabinets delivered ready to use.
- Self-contained cabinets for your safety.
- Elimination of hazardous fumes.
- No connection or evacuation required, no civil engineering solution.
- Immediate visibility of stored products.
- Perforated shelves to allow liquids to drain in the event of an accidental spill.
- Window for checking the presence of the filter adapted to your needs.
- High efficiency active charcoal filter specialised and treated according to the products stored and tested to NF X 15-211 standard.
- Anti-dust filter, 92% efficiency of particles > 3 µm.
- Easy replacement of the active charcoal filter.
- FILTRALARME 5 interface with touch screen for ergonomic operational management of the fume hood.
- 5 languages available: French - English - German - Spanish - Italian.
- Automatic air flow regulation.
- Air flow and hour meter displayed simultaneously.

- The date of installation of the filters and their types is indicated and visible during the operation of the fume hood.

TECHNICAL CHARACTERISTICS

Storage compartment(s):

- 15/10th steel construction, double-walled doors (AF1C: melamine frame).
- Large polycarbonate glass door(s) with key lock.
- White RAL 9010 and blue RAL 5015 polyester paint.
- Height-adjustable perforated shelves.
- Ventilation holes.

“Ventilation/filtration” compartment:

- Silent fan: CE 220-240 volts - 50 Hz; 202 m3/hour flow rate; 0.2 A; 70 watts; 49 dB(A) sound level (excluding air flow) with plug and cable.

OPTIONS *(see also table on next page)*

Additional shelves

Active charcoal filters:

The cabinets are delivered without active charcoal filter. You must select one from the table at the bottom of the next page according to the type of products you store and change them at least once a year.

Filter saturation level control by REACTIVE TUBES:

- Control port on the front of the cabinet
- Hole for the introduction of specialised reagent tubes
- Use of a manual pump.
- Detection of the efficiency or saturation of the active charcoal filter by reading the tubes.
