### ECO-DESIGN AND OUR RESPONSIBLE PRACTICES

Eco-design is a key concept for building a sustainable and environmentally friendly future. This approach aims at integrating environmental considerations from the design of products, to minimize their impact on the environment. Eco-design has several benefits for companies, consumers and the planet by reducing the consumption of natural resources. It can also improve the quality of products by using sustainable and ecological materials.

**Ecosafe** has been committed to a responsible approach for 50 years. Today we wanted to materialize our action in the design of this first product that accompanies our CSR policy.

**Ecosafe** launches the first series of cabinets for the storage of dangerous products with a **100% recycled** structure. This cabinet is also **100% recyclable!** All components can be fully recycled or reused for a new purpose.

We encourage the **recycling** of our active charcoal filters

We use **recycled/recyclable materials packaging** and raw materials

Our carriers are chosen for their **optimized consumption**

The structure of the cabinet is built with **100% recycled materials** from the transformation of refrigerators

1 Secondary compartment

2 Sliding rails with new stop system

3 H50C + CORG201

## RECYCLABILITY CHARACTERISTICS

Cabinet structure is built with **100% recycled** materials: Polystyrene 100% recyclable

- Blue tray and slide in Polypropylene: **100% recyclable**
- Secondary tray in PVC: **100% recyclable**
- Aluminum handle: **100% recyclable**
- Glass insert **100% recyclable**
- Exterior metal screws **100% recyclable**
- Pictogram Vegan stickers

## COMPLIANCE

Standardized pictograms in accordance with ISO 3864, ISO 7010 and NF X 08.003 standards, and with the European directive 92/58/CEE.

- Complies with the recommendations of the I.N.R.S.

## BENEFITS

- Specially designed for the storage of acids and bases.
- Compartmentalized cabinets for the separation of acids and bases (except for the APC33+ model, either acids or bases).

## PASSIVE SAFETY

- 100% recycled and recyclable polystyrene construction.
- Standardized «Acids», «Bases» and «Toxics» symbols (APC103+ model only).
- Sliding retention shelves/bins with stopper in each main compartment.

- Independent compartments (except for APC33+) for the storage of acids, bases and toxic products (only for APC103+).
- Manufactured from high rigidity plastics, the 8E series cabinets are durable, waterproof and hygienic.
- Each cabinet is divided into a main compartment and a secondary compartment (except for the APC63+, APC113+ and APC223+ models).

## ACTIVE SAFETY

- Top and bottom ventilation holes with Ø 100 mm sleeve for possible connection.
- Doors with key lock:
- hinged for models APC33+, APC93+ and APC103+.
- sliding for models APC63+, APC113+ and APC223+.
- Jack feet for leveling.

## OPTIONS

3 **Labopur** H50 recirculation air box:

Benefit from **Labopur** technology on your safety cabinet thanks to the **Labopur** housing whose ventilation/filtration system and filter adsorption capacity have been tested and approved to the NF X 15-211 standard of May 2009.
